

Radioactive Material Findings for Fishery Products (announcement no.267)

February 27, 2026

1 Test Results of Fishery Products

	Food tested	Area	Sampling date	Testing Institute	Results 【Radioactivity(Bq/kg)】	
					Cs-134	Cs-137
1	Cherry salmon	Akigawa River upstream (Akiruno City)	Feb. 2, 2026	Marine Ecology Research Institute	ND (<4.7)	ND (<5.0)
2	Cherry salmon	Asakawa River upstream (Hachioji City)	Feb. 2, 2026		ND (<4.2)	ND (<5.1)
3	Cherry salmon	Tamagawa River system Minedani River (Okutama Town)	Feb. 4, 2026		ND (<4.4)	ND (<4.7)
4	Cherry salmon	Tamagawa River system Nippara River (Okutama Town)	Feb. 4, 2026		ND (<4.9)	ND (<4.1)
5	Cherry salmon	Tamagawa River upstream (Okutama Town)	Feb. 3, 2026		ND (<4.4)	ND (<4.9)

※ The guidance level for radioactive cesium in fishery products is 100Bq/kg for cesium-134 and cesium-137 combined (agricultural, forestry, and fishery products are categorized in the food group "general food products")

※ "ND" indicates that levels were less than the detection limit (minimum level able to be detected) in analyses conducted by the testing institutions. The figure in () is the detection limit.
