

# Radioactive Material Findings for Fishery Products (announcement no. 202)

September 17, 2020

## 1 Test Results of Fishery Products

Food tested	Area	Sampling date	Testing Institute	Results 【Radioactivity(Bq/kg)】	
				Cs-134	Cs-137
1 Brackish-water clam	Tamagawa River downstream (Ota Ward)	Sep. 11, 2020	Marine Ecology Research Institute	ND(<3.1)	ND(<3.4)
2 Splendid alfonsino	Kouzushima harbor (Kouzushima Village)	Sep. 4, 2020		ND(<4.3)	ND(<3.9)

※ The guidance level for radioactive cesium in fishery products is 100Bq/kg for cesium-134 and cesium-137 combined (agricultural, forestry, and fishery products are categorized in the food group "general food products")

※ "ND" indicates that levels were less than the detection limit (minimum level able to be detected) in analyses conducted by the testing institutions. The figure in ( ) is the detection limit.

## 2 Other

Please see the website of the Ministry of Health, Labour and Welfare for nationwide results.
